Response to Amendment

1. Amended claims 1 and 8 are entered as requested.
2. In light of further review of the application, new objection/rejection follows:
3. The terminal disclaimer, filed on March 17, 2004, to overcome provisional obviousness-type double patenting rejection is made of record.
4. Claim 4 is objected to because of the following minor informalities:

In claim 4, line 2, "switching planes" to be replaced with --switch planes-- in order to conform to earlier claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the allocation table" in line 3. There is insufficient antecedent basis for this limitation in the claim. Is it "allocated table" as in line 2 of the claim or "allocation table" as in line 3 of this claim?

Art Unit: 2667

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5 and 8-14 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-5, 8-14 of copending Application No. 09/333,218. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

6. Claims 6 - 7 are objected to as being dependent upon a rejected base claim, but would be allowable if (a) rewritten in independent form including all of the limitations of the base claim and any intervening claims, (b) rejection under 112, 2nd paragraph (see Para. 5 above) is removed.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2667

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
